

Computation for the semester grade:

By Donna Nonneman

If a semester test is required:

- The first nine weeks average percentage grade equals 40% of the semester grade.
- The second nine weeks average percentage grade equals 40% of the semester grade.
- The semester test grade equals 20% of the semester grade.

If a semester test is not required:

- Each nine weeks equals 50% of the semester grade.

Student Name _____ Class/period _____

First nine weeks grade _____ X .40 = _____

Second nine weeks grade _____ X .40 = _____

Semester test grade _____ X .20 = _____

Total semester grade = _____

If a semester test is not required:

First nine weeks grade _____ X .50 = _____

Second nine weeks grade _____ X .50 = _____

Total semester grade = _____
